Top quality. Top price.

Electronic sow feeding system for pregnant sows

Call-Inn: ready for the future with BigFarmNet

With **Call-Inn** Big Dutchman offers you an economic, high quality electronic sow feeding system (ESF) for pregnant sows in group housing. In addition to the familiar sturdy design, the stainless steel trough and closed side partitions, the system also features a reliable and simple system

control by means of BigFarmNet. Big Dutchman's Call-Inn fulfils all conditions of modern group housing including the best possible utilisation of housing space and individual feeding.

Call-Inn has an extremely high functional reliability and stands out due to the precise metering of feed. The new electro-pneumatic metering mechanism is as amazing as it is precise. A small cylinder reaches into the storage hopper. If a sow is entitled to receive feed, the cylinder is lowered up to the limit stop and approx. 60 g of feed (depending on the feed consistency) trickles into the trough. This process is repeated until the sow is no longer entitled to receive feed or until she leaves the station.

Features

- ✓ group housing of max. 60 sows per station;
- ✓ designed as dry feeding system with one feed type;
- ✓ very precise feed metering;
- ✓ complete trough unit made of stainless steel;
- ✓ colour-marking (1 colour, option);
- ✓ entrance door and trough flap are opened and closed automatically;
- ✓ use of sound-absorbing materials → low noise level inside and around the station;
- ✓ practical BigFarmNet control;
- ✓ suited for new and refurbished buildings.

Trough flap closed
– the sow is not entitled to receive feed –

Trough flap open
– Small portions of feed trickle into the trough –

Big Dutchman.
