

FLUXX
Broiler Feeding System

The patent pending FLUXX broiler feeding system is the industries latest innovation in **broiler feeding technology**. The FLUXX system has been **farm tested around the world**, showing it to be the best at faster starts and bigger birds.

The 360° **floor** provides a large amount of feed at the edge of the pan making it easily accessible.

When a flooding pan is no longer required, simply winch the feeders off the floor and the feed adjust returns to the preset grow-out position. In the grow-out position the feed volume per pan is reduced, and the feed is delivered to the feeding area, giving **easy access to the feed**.

Each pan has the feature of a feed saver lip which reduces waste, along with the feed saver fins which will help keep the birds from wasting the feed, and the 360° rotation of the feeder that insures even feed distribution.

- 1** TRUflood™ 360° high feed level flooding allowing feed accessibility, day one.

- 4** Feed levels are easily set with our "Spin-n-lock" adjustment. Preset grow out adjustment is returned as soon as the system is winched off the litter, reducing labor.

- 2** Five arm grill provides easy access.

- 5** Internal lip is designed to give big birds easy feed access without wasting feed or injuring birds.

- 3** Pan spins 360° providing even feed distribution in the pan.

- 6** Swinging pan yields less bird injury and is easy to clean.

- 7** Snap on top cap for easy installation and service, saving time and maintenance costs.

Heavy duty plastic construction creates a system that will last for years with minimal maintenance.

Every element of Big Dutchman's feeding system is designed for optimal performance and durability.

Big Dutchman's feeder and hopper unit

- Permanently lubricated, sealed bearings give the unit an exceptionally long life.
- Removable extension allows the unit to be winched up until the feeder reaches the desired height for easy clean-out.
- Hopper wall design allows superior feed-out of all types of feed, providing a steady supply to the auger and faster filling of all pans.

Big Dutchman's auger and tube

- Constructed of heavy-gauge, steel with smooth flighting for long tube life and high energy efficiency.
- Heavy-gauge construction of the tube prevents twisting, wear, and feed entrapment.
- Feed drop-out holes handle most types of feed with no separation of ingredients.

Big Dutchman drive units

- Reliable, energy-efficient, durable feed-drive units are available in your choice of belt-drive or direct-drive models.
- Drive units feature a low-profile design that provides more winching headroom for cleaning.

Put it all together, and you've got the most proven, cost-effective broiler feeding system on the market.

Big Dutchman's systems deliver **dependability, low feed conversions, and minimized feed wastage** in a reliable, efficient package.

Call Big Dutchman today, and let one of our system consultants configure a feeding system to meet your operation's needs **(616) 392-5981** or send e-mail to **bigd@bigdutchmanusa.com**, or visit **www.bigdutchmanusa.com**
